

# Slow the Flow!

Inexpensive and simple to install, SES aerators can reduce your home water consumption by over 50%, and can also reduce your energy costs of heating the water by as much as 50%. Aerators introduce air into the water stream to produce a larger and whiter stream soft to the touch and non-splashing.

SES Ltd provides aerators made to match the specific pressure and flow requirements of your building. With a range to cover most applications, SES Ltd also allows you to choose your own preferred flow rate and spray pattern and matches it to your water pressure.

## BENEFITS:

- **Saves money** - reduced water costs
- **Saves Energy** - reduced energy costs for heating water
- **Simple to fit.** - Simply threads onto tap
- **Inexpensive** - payback in less than a few months
- **Security** – Vandal proof versions available

This conservation of water and energy is not only good for the environment, but the savings in your utility bills will pay for the cost of the aerators within a few months. From then on, you enjoy continued savings.

Installing low flow tap aerators is the single most effective water conservation step you can do for your home or business.

  
**SmartEnergySystems Ltd.**  
water, energy, environment      save everyday.

# Turn off that tap!

SES Ltd are now offering retrofit, push taps to convert your old tap fittings simply and easily without the need for costly plumbers to carry out the work. 6 presses in a minute will only use about 2 litre of water.

With SES Ltd you won't have to worry about running taps. SES Ltd offers a range of water saving taps for all applications and budgets. We stock three main types:

- Infra red taps
- Push taps
- Retro fit push taps

SES Ltd can provide infra red taps in both mains and battery format depending on environment restrictions. Infra red taps are especially useful where cross contamination issues need to be taken into consideration such as in the health care sector.

Our push taps are very effective in high volume restrooms such as schools universities factories etc.

## BENEFITS:

- **Saves money** - reduced water costs
- **Saves Energy** - reduced energy costs for heating water
- **Inexpensive** - payback in less than 12 months
- **Security** - reduces flooding risk from vandals
